Scope Statement

Project Title: Website for buying video games
Date: March 14, 2018   **Prepared by:** Divyansh Sharma, Project Manager

Project Justification: This project will be the creation of a user-friendly web-based application. The application will be put to use for providing online digital games from home. The project will offer a wide range of games including UBISOFT, Rockstar Games, Activision, WB and many more. The use and success of this application will produce a great deal of revenue for Video game rental service.

.

Product Characteristics and Requirements:
1. Site should accept almost every payment method.
2. User-friendly application.
3. Site will allow users to order games.
4. Ability to track status of shipping.
5. Ability to search games by various characteristics.
6. Site should provide customer reviews.
7. Prime feature for instant delivery.
8. Include best deals including giveaways and regular global competitions.

Summary of Project Deliverables
Project management-related deliverables: business case, charter, team contract, scope statement, WBS, schedule, cost baseline, status reports, final project presentation, final project report, lessons-learned report, and any other documents required to manage the project.
Product-related deliverables: research reports, design documents, software code, hardware, etc.
1. Support different languages.
2. User-friendliness in all features.
3. Site available globally.
4. Comprehensive search tool.
5. Site should remember returning username and password.
6. Available tracking option.
7. Ability to accept alternate payment options.
8. Easy and reliable delivery.

Project Success Criteria:
In order for the project to be successful, it should meet all the requirements listed above. This site will promote unique services to the customers. It has the opportunity to gain a large customer base if the application can successfully provide the necessary requirements in a user- friendly way. However, there are many similar applications in the market but we will put the best features taking views and considerations from existing applications. The project as a whole will be a complete success.
